

6516207486.txt

I have been a subscriber to satellite radio for more than 3 years now. They provide a much better product than regular FM or AM radio. I applaud the effort of providing traffic and weather locally. It is not available in my market as of yet. I reject NAB's petition 04-160. I own subscriptions in both providers and think that if I am paying for the service that the government should not regulate it.
Thank You
Kemp Garcia
